Alex Morgan - Software Engineer & Data Enthusiast
Email: alex.morgan@example.com | Portfolio: github.com/alexmorgan

SUMMARY
Energetic software engineer with practical experience developing Python backend services, building responsive web applications, and working with SQL databases and Git version control.

TECHNICAL SKILLS
Languages & Frameworks: Python, FastAPI, Django, JavaScript, React, HTML, CSS, SQL, PostgreSQL
Developer Tools & DevOps: Git, GitHub, Docker, REST APIs
Data & AI: data analysis, Excel, Machine Learning, NLP

EXPERIENCE & PROJECTS
Junior Backend Engineer | TechLab Solutions (2024 - Present)
- Designed and maintained REST APIs using Python and FastAPI for high-throughput client services.
- Managed database schemas and optimized SQL queries in PostgreSQL.
- Collaborated using Git and GitHub with code reviews and automated Docker container builds.

Full Stack Web Application Project
- Developed a web application using React, JavaScript, HTML, and CSS for the frontend.
- Built backend endpoints in Python and FastAPI, serving structured JSON responses.

Data Insights & Analysis Project
- Conducted exploratory data analysis on real-world datasets using Excel and Python.
- Implemented baseline Machine Learning models and experimented with NLP techniques.
